Third Fortnightly
Crop Report

Issued by the Department of Agriculture at Edmonton, June 18

Very satisfactory reports continue to come in to the Department of Agriculture as to the progress made by crops throughout the province during the past two weeks and as to excellent prospects as indicated by their condition at the present time. Wheat in many early-sown fields is from eight to ten inches high, covering the ground well and conserving to the best advantage the supply of moisture in the soil. Seeding of oats and barley has been practically completed during the past week, with the exception of some late green feed, and these grains as well as wheat are making vigorous growth.

Rain in some sections of the southern part of the province has recently interfered with the completion of late seeding and the soil in this area is in better condition as regards moisture than it has been at this season for a number of years. In the central and northern sections of the province winds have been more prevalent than usual, with the result that although crops are not yet urgently in need of moisture, occasional showers are proving very beneficial.

Reports from all sections of the province indicate that this year, far from showing the marked decrease anticipated during the late spring, will be practically on a par with that of 1926. Slight reductions are reported in a number of districts, but these are more than made up by the additional crop seeded on new land in other localities, while in still other areas where seeding was decidedly delayed, a smaller acreage in wheat is made up by an increase in the coarse grain seeded. The average of fall wheat in the south of the province is reported to be considerably greater than usual and this crop has survived the past winter better than is usually the case. Fall rye has made good growth and is headed out in a number of districts.

Sod land is in excellent condition for breaking; much new plowing is reported in the irrigation belt in the south, and indications are that the acreage of new land brought under

JUDGE HELEN MACGILL of the Women's Court at Vancouver, who, at the annual convention of the Child Welfare Association in that city, advocated a law making it impossible for parties securing marriage licenses to be wedded before three days have elapsed. Judge MacGill stated it had been found that many happy marriages resulted from the ease with which marriage licenses could be secured.

Edith Cavell Memorial Church

Plans will be undertaken this summer for the erection of a church in Jasper to be known as the Edith Cavell Memorial Church, at the foot of the Glacier of the Angel, Mount Edith Cavell, Jasper National Park, as a tangible tribute to the memory of the martyr of the Great War.

Cultivation throughout the province this season will be largely equal to that in 1926. Hay crops and native pastures have made rapid growth and livestock is in splendid condition. Sheep camps on the ranges in the south report heavier than usual losses in the lamb crop owing to the unfavorable weather at lambing time. Shearing is well under way among range flocks.

Crop prospects generally are regarded as very promising and given warm growing weather during July and August, there is every cause for optimism as to the outcome for the season.

Will kill many more flies for the money than any other fly killer. Each pad will kill flies all day, every day, for three weeks. At all Grocers, Drugists and General Stores 10c and 25c per package.

WORLD HAPPENINGS BRIEFLY TOLD

Perhaps the first woman in Canada to take up aviation, Miss Elvyn Vollick, is in daily receiving instruction at a Hamilton aerodrome and has applied to Ottawa for a pilot's license.

Captain George H. Wilkie announced before sailing for Seattle that he would shortly return to Alaska to renew his explorations of the Arctic Ocean.

Hon. Mr. Justice Riddell, of the Supreme Court of Ontario, was re-elected president of the Canadian Social Hygiene Council at Toronto for the fifth consecutive year.

The Manitoba Cricket Association has decided to send a team to Vancouver next August to compete in the Western Canada cricket tournament. The personnel of the team will be selected after a series of test matches here.

A Russian dispatch from Odessa says that eleven persons charged with espionage in behalf of Roumania have been sentenced to death by the Soviet authorities. Three others were sentenced to ten years' imprisonment, while two were acquitted.

The United States Court of Appeals has reversed the decision of the United States District Court of Northern Texas which granted Frederick A. Cook, Arctic explorer, a five year probation. Dr. Cook was sentenced to 18 years' imprisonment three years ago for dealing in spurious oil stocks.

Canadian authorities will be required to make the necessary inspection of pasteurization plants, dairies, stables and herds, in order to meet the requirements contained in the latest Enactment respecting the entry of milk and cream from this country to the United States.

Canada is "abroad" no far as the United States customs law is concerned and American goods being brought back to the United States household goods and personal effects to the value of \$100 without customs duty. This is the effect of the ruling of Judge Young of the customs court.

Economy on your part would be wasteful on the part of your neighbor.

The Most Popular Kitchen Ware

In All Canada

You see it everywhere—the pebbly gray enameled ware that appeals long service and real, old-fashioned satisfaction. This splendid kitchen ware, SMP Pearl Enamelled Ware, defies wear and its surface, like all SMP Enamelled Ware, is so clean-smooth and clear it harbors no taints or impurities.

You need no steel wool or special cleanser to keep SMP Pearl Ware sparkling clean. Soap and hot water do the trick in a jiffy. Made in every new handy shape and size by an old established Canadian industry.

British Force Was Adequate

Would Eventually Have Won War Without U.S. Aid Says Earl Haig

The belief that the British armies would eventually have gained a victory in the world war, even if the United States had not intervened, was held by Field Marshal Earl Haig, commander-in-chief of the British expeditionary forces in France and Flanders from 1915 to 1918.

Addressing the British Empire Service League he strongly protested against what he described as a national tendency to belittle the part Great Britain played in winning the war.

He referred gratefully to the share of the allies but contended that although without United States intervention the result might have been delayed it would have been the same.

The field marshal maintained that for the last 18 months of the war the armies of the British Empire carried on their shoulders the main burden of the struggle and carried it to the victory.

"The national tendency to belittle our own achievements fostered and encouraged by political considerations," he declared, "has led us to ascribe our victory to the fortunate destiny of our country, to the military genius of the allies, to the mistakes of our enemies, to the intervention of America, to anything rather than the true cause, namely, the inherent fighting qualities of the British armies and the endurance, loyalty and discipline of British peoples in all quarters of the world."

"If America had not come in, we might not, perhaps, have forced the enemy to surrender in 1918, for without our American reserves in existence it would have been necessary to throw the whole force of the British army into the tremendous series of battles which brought the war to a sudden end, according to many politicians, unexpected end, but we should have won in the end all the same."

As for the mistakes of Germany, he said she only made two serious errors, first, when she began the war under conditions which brought in the British Empire, and, second, when she lost the war.

Special Classes at Brandon

Open Only to Amateurs at Manitoba Provincial Exhibition

Special attention is being directed to the Manitoba Live Stock Show at the Provincial Exhibition of Manitoba. These classes include sheep, both dairy and beef, breeds in cattle. These are open to amateurs only, amateurs to be classed as such never having shown at a class "A" fair outside the province. The Yorkshire and Holstein breeds are to be well represented in these classes and it is expected there will be a good representation of Aberdeen-Angus, Shorthorns and Herefords.

Bottled Sunshine Predicted

That sunshine may be bottled and sent to any part of the world is a scientific possibility according to a report recently read before the Association of German Chemists in Berlin. The Germans believe that by means of huge sun engines along the Nile, water can be converted into hydrogen, which can be transported to cold regions and later burned for light and heat.

Honors Canadian Soldiers

Memo Pays Tribute to Men Who Brought Relief to City

Heartfelt recognition of what the Canadian soldiers had done in capturing the city of Mons, where the final shot in the war was fired and the city restored to its freedom after 50 months of German occupation, was given by Burgo-master Maltrian, of Mons, at the unveiling of the plaque in commemoration of the heroic conduct of the Canadian corps into the city.

The Burgo-master replied on behalf of the city to the eloquent address of Hon. Rudolph Lennox, speaker of the Canadian House of Commons, and to tributes paid by other taking part in the ceremony.

Burgo-master Maltrian paid glowing praise to the heroism of the Canadians and spoke of the deep gratitude of the people of Mons for the relief they had brought to the city. As a special mark of recognition, the Burgo-master announced that the following had been made honorary citizens of Mons:

General Sir Henry H. Horne, Commander of the First Army in whose territory the Canadians operated.

Lieut. General Sir Arthur Currie, commander of the Canadian corps.

General J. O. W. Loomis, in command of the third Canadian Division, and Brigadier-General J. A. Clark, who was in command of the seventh Canadian Brigade, whose troops were the first to enter Mons.

The latter had also been made a member of the Mons Bar, the Burgo-master said.

"Exploring will all be done from the air in future," declared Captain Abundant of polar fame before sailing from Vancouver for Japan.

"For this reason Captain Abundant has abandoned any plans for further exploration and will content himself for the present with refilling of his supplies. His present journey to Japan is for the purpose of delivering a series of lectures in the principal Japanese centres."

Noted British Author Dead

"Three Men in a Boat" Endorsed Here by Thousands

Jerome K. Jerome, noted British author died of Northampton, England, on Monday.

Mr. Jerome, who was perhaps best known for his "Three Men in a Boat," was stricken at Northampton while on a motor tour and was placed in a hospital. While his condition continued serious reports were received to the effect that he had been improving and news of his death came as a shock.

The adventures of "Three Men" on a river holiday cruise in England endeared Mr. Jerome to the English reading world at the beginning of 1900, placing him in the front rank of English humorists, although the author, noted for a naive and whimsical felicity of style, was also identified with the stage and play writing.

Of his plays, the "Farside of the Third Floor Back," achieved a wide popular popularity.

Upon the Great War, Mr. Jerome urged "a peace without honor." With others he signed an appeal asking that the peace terms be modified.

Jerome's English home was at Walsall, England, on May 2, 1939, and was the only surviving son of Rev. Jerome Clapp Jerome. He was married in 1884 to Georgina Henrietta Stanley, a daughter of a Lieutenant in the Spanish army.

Following a grammar school education at Marylebone, Jerome in turn became a clerk, schoolmaster, actor, journalist and playwright. He was for more than 20 years one of the best known writers in England and was widely read in America. His last book, a biography, was one of the most widely commented upon works of the sort in Great Britain.

Believes in Aviation Future

Exploration Has Succumbed to Modern Methods Says Amundsen

Even exploration, the oldest urge of mankind has succumbed to the expediency of modern methods of travel, and in aviation lies the future discovery of new lands declared Captain Abundant of polar fame before sailing from Vancouver for Japan.

"For this reason Captain Abundant has abandoned any plans for further exploration and will content himself for the present with refilling of his supplies. His present journey to Japan is for the purpose of delivering a series of lectures in the principal Japanese centres."

SUNDAY SCHOOL LESSON

JUNE 24

LIFE AND LETTERS OF PETER.

Golden Text: "Come ye after me, and I will make you fishers of men." Matthew 4:19.

Reading: 1 Peter 5:1-11.

Devotional Reading: Isaiah 55:1-12.

A Review by Means of Allusions

Ascertain how many recognize each allusion as you read it. After a member of the class has explained the reference, ask a few questions about the lesson in which it occurs.

Self is the only person that can ever bind the soul.

Love is the only angel that can bid the gates unroll.

And when he comes to call thee, arise and follow fast.

His way may lead through darkness, but it brings to light at last.

—Henry van Dyke.

And the voice which came from heaven we heard when we were with him on the holy mount—Peter.

On the day of the heavenly vision with a voice of peace without fear.

Of mortal, the friendly flames of the dying soul glared like the tongues of fire before Apostles foretelling—Longfellow.

And Cardinal Desmet gave us new life.

Lord's Peter, in his time of fear, received his master, as, and thence, one Lord—Tennyson.

I saw all to follow thee—

To him who gave up his life to win to him waves of Galilee!

—Thomas Aldrich

Let all our hearts with him rejoice, and bid the saints of old.

When the Lord's voice called, the rescued Peter told—Whittier.

We shall be sifted till the strength of our faith be changed to length of meekness—Longfellow.

A photographer makes a sensitive plate exposed to just the rays of light that he chooses, dips it into the proper solution, and holds it up to the light to see if his picture is there.

What else did this great Teacher do but to hold up his life to the light to find out if the reflection of the Son of God were fastened there—Self.

"In warning Germany I found professors spreading the idea that Germany is the rock selected by the Almighty God upon which to build His church."

Yours recent like St. Peter's words betray you.

Did you see yellow head and blue eyes—Longfellow.

We are inclined to obey him rather than to think more about what others will say than about how God will the people—Self.

"You see the church can no longer be like Peter, silver and gold have been loaded into the ark."

—Thomas Aquinas, and that great philosopher remarked in his turn: "Nor can we say, 'I'll go up and will be as God'."

—Whittier.

And when he has himself endured this fleshhood, knowing how to die, and sinking venture it can drag us down.

And down in the melancholy deep, behold him that I walk these waves Reaching—Mrs. Hemans.

And in the hereafter, angels may Roll the stone from the grave away—Whittier.

Invention to Test Quality of Diamonds

French Chemist Obtains Perfect Results With Ultra-Violet

M. Melval, a French chemist attached to the Lyons police laboratory, has invented a method to test the quality of diamonds by means of ultra-violet rays.

Various attempts have hitherto been made to measure the intensity of the fluorescence of these stones by photographic means, but solar light has always proved too diffused for accurate result.

M. Melval has obtained perfect results with ultra-violet rays passed through a screen.

The pure white stones give the clearest picture, yellow stones showing darker, while imitation diamonds show quite black.

It is claimed that the method will make it impossible to substitute stones of lesser value for real diamonds placed in deposit, for example, in the possession of the diamonds need to be to get an ultra-violet ray picture made of them before temporarily giving up the stones and then have a second picture made when they are returned. The method will make it possible to decide the exact value of any diamond with almost mathematical accuracy.

Jim—"What did the jury do to the thief of the precious homocentric necklace?"

Ned—"Found him not guilty, but advised him to return the necklace."

What is a chrysanthemum? Nothing more than a master barber. And a chrysanthemum is ye old time barber shop up to date.

The word "and" occurs 466,277 times in a total of 773,746 words used in the Bible.

Life Of Early Canadian Settlers

Primitive Life of First Settlers in Upper Canada

In this jubilee year one may contrast the life of the immigrant today with that of his predecessors in old Canada.

Under the U. E. Loyalists, who had the only sailing vessels, and the settlers had a long voyage across the Atlantic in a sailing vessel, and travelled through to their destination by the inland waterways or by stage.

As they struck out into the wilderness even roads were few and far between. Schools and churches were non-existent or difficult of access.

A good picture of early settlement in Upper Canada is given by the historian McMillan.

He describes the settler going into the woods with no more worldly possessions than a gun, an axe and the clothes on his back.

"Thus lightly equipped, he took possession of his two hundred acres, cleared a few acres of land, and commenced operations. The weeding again with the vigorous strokes as huge tree after tree is assailed and felled to earth, and the sun presently shines in upon the little clearing. The best of the crops of decayed vegetation is gathered into little hills, Indian corn is planted in another direction, and perhaps a little wheat. If married, the lonely couple struggle on in their forest oasis like the solitary hermit over the sands of Arabia, or a boat stricken at the Atlantic. The nearest neighbor lives miles off, and when sickness comes they have to rely on their own strength for aid. Human sympathy. But fortunately our nature, with elastic temperament, adapts itself to circumstances. By and by the potatoes peep up, and the corn blades modestly show themselves around the charred maple stumps over the sands of Arabia, and the prospect of the sufficiency of food gives consolation. As winter approaches, a deer now and then adds to the comforts of the solitary people. Such were the mass of the first settlers in Upper Canada."—London Advertiser.

New Type of Airplane

Invention of French Postman Operated by Compressed Air Motor

A French postman, M. Ernest Bole, of Levallois, a little town near Avignon, France, who claims to have invented a new form of flying machine, is operated by a compressed air motor and six high-pressure air tubes which would permit instant elevation, placed a model of his invention on exhibition at the arena there. Justastated to the motor appears a novel turbine apparatus which is in air to replace the propeller. The inventor of the machine, thereby dispensing with any need of fuel power.

The model resembles the Santos Dumont model in form. The model shows two transmission pulleys and two motors, one located over the nose of the machine and the other below midship.

Aside from the compressed air motor which is the most important feature of this invention, the postman's aeroplane distinguishes itself from other flying machines in being able to achieve vertical elevation, and the safety of the pilot is secured through transformation of the wings into parachutes. The inventor of the machine hopes to give it a trial soon at the aerodrome in Lyons.

Germany Warns Soviets

Says Communistic Propaganda in Other Countries Should be Stopped

German newspaper correspondents, after interviewing Foreign Minister Stresemann, telegraphed that Germany had decided to warn Soviet Russia that it was advisable to bring to an end communistic propaganda in other countries. The German minister was quoted as saying it was a great pity that Soviet Russia did unwise things which strengthened the hands of her enemies. He believed, however, that responsible persons in other countries did not wish to break with Russia, though "but" in a some of them were demanding extreme measures.

"I was shocked to hear that Peter eloped with your wife. I always thought he was your best friend."

"He is, but he doesn't know it!"—Toronto Gossip.

It would be strange if the company a man keeps didn't know him.

Misfortune often puts us wise to our own carelessness.

It is a pity that the company a man keeps doesn't know him.
